Office Action Summary	10/500,786	LONGSWORTH, RALPH C.				
Office Action Summary	Examiner	Art Unit				
The MAILING DATE of this communication	William C. Doerrler	3744				
The MAILING DATE of this communication app Period for Reply	lears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 10 Ap	oril 2007.					
2a) ☐ This action is FINAL . 2b) ☐ This	<u> </u>					
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is						
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
4)⊠ Claim(s) <u>1-3,5-7,9 and 10</u> is/are pending in the application.						
4a) Of the above claim(s) is/are withdrawn from consideration.						
5)⊠ Claim(s) <u>3</u> is/are allowed.						
6)⊠ Claim(s) <u>1,2,5-7 and 9</u> is/are rejected.						
7) Claim(s) <u>10</u> is/are objected to.						
8) Claim(s) are subject to restriction and/or election requirement.						
Application Papers						
9) ☐ The specification is objected to by the Examiner.						
10)⊠ The drawing(s) filed on <u>02 July 2004</u> is/are: a)⊠ accepted or b)□ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:						
 Certified copies of the priority documents have been received. 						
2. Certified copies of the priority documents have been received in Application No						
3. Copies of the certified copies of the priority documents have been received in this National Stage						
application from the International Bureau (PCT Rule 17.2(a)).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1,2,5-7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mitchell in view of Gao.

Mitchell discloses applicant's basic inventive concept, a pulse tube with a buffer on the opposite side as the warm end of the regenerator and a rectifying circuit which also serves to cool the gas passing through (column 8 line 39-41), substantially as claimed with the exception of using a multiple stage pulse tube and valves to control the phasing of the working gas. Gao shows these features to be old in the pulse tube art. It would have been obvious to one of ordinary skill in the art at the time of applicant's invention from the teaching of Gao to modify the pulse tube with a rectifying circuit of Mitchell by

using a two stage pulse tube to achieve a lower temperature and to use valves to control the phasing to achieve the lower temperature efficiently and controllably. The rectification circuit of Mitchell is seen as passive, as it does not require energy to function.

Allowable Subject Matter

Claim 3 is allowed.

Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 4-10-2007 have been fully considered but they are not persuasive. Applicant states that most, but not all the gas circulates through separate tubes in Mitchell. It is unclear where it is claimed that all the gas in applicant's device circulates in one direction. It is also unclear why it is stated that the gas flows through the vortex diodes in Mitchell in only one direction. While this is true, applicant has not claimed any structure in the rejected claims to separate applicants' invention from the teaching of Mitchell. Mitchell will provide circulating flow and rectification, which is all that is called for in claim 1. Mitchell is seen to show rectification as most of the flow will tend to flow in one direction. Claim 10 is claiming check valves, which will limit reverse flow, but claim 10 was objected to as containing allowable subject matter. Claim 1 also merely claims that the rectification circuit includes a cooling means. The water jacket of Mitchell is seen to supply adequate teaching to meet the claim as

written. It is agreed that Mitchell does not use the rectification circuit to cool the hot end of a pulse tube. However, applicant has not claimed that the rectification circuit provides the cooling, only that a cooling means (providing cooling either to the refrigerant, or by the refrigerant) is included. The use of Gao is not seen as hindsight, as Gao would teach one of ordinary skill in the art that any pulse tube could be controlled using valves and be a multi-stage cooler to provide a lower temperature with easily manipulated controls.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Doerrler whose telephone number is (571) 272-4807. The examiner can normally be reached on Monday-Friday 6:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on (571) 272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
